Under normal market conditions, the Fund will seek to achieve its investment objective by investing at least 65% of its net assets in a portfolio of equity securities of publicly traded U.S. companies. In selecting the Fund's portfolio securities, RiverFront assembles a portfolio of eligible securities based on several core attributes, including, but not limited to, value, quality and momentum. RiverFront will consider multiple proprietary factors within each core attribute, such as the price-to-book value of a security when determining value, a company's cash as a percentage of the company's market capitalization when determining quality and a security's three month relative price change when determining momentum. RiverFront then assigns each qualifying security a score based on its core attributes and selects the individual securities with the highest scores for investment. In doing so, RiverFront utilizes its proprietary optimization process to maximize the percentage of high-scoring securities included in the portfolio. RiverFront will also consider the market capitalization of the companies in which the Fund may invest, and the trading volume of a company's shares in the secondary market.

Important Disclosures & Definitions

An investor should consider investment objectives, risks, charges and expenses carefully before investing. To obtain a prospectus which contain this and other information visit www.alpsfunds.com. Read the prospectus carefully before investing.

RiverFront Dynamic US Flex-Cap ETF shares are not individually redeemable. Investors buy and sell shares of the RiverFront Dynamic US Flex-Cap ETF on a secondary market. Only market makers or "authorized participants" may trade directly with the Fund, typically in blocks of 50,000 shares.

The performance of the Fund relative to its benchmark will depend largely on the decisions of the RiverFront Investment Group, LLC (the "Sub-Advisor" or "RiverFront") as to strategic asset allocation and tactical adjustments made to the asset allocation. At times, RiverFront's judgments as to the asset classes in which the Fund should invest may prove to be wrong, as some asset classes may perform worse than others or fixed income markets generally from time to time or for extended periods of time. The performance of the Fund is related to the market sectors that RiverFront may choose to emphasize or deemphasize from time to time, as well as to the individual securities selected by RiverFront within those sectors. The investment returns for

particular market sectors will fluctuate and may be lower than other sectors. In addition, the individual securities chosen for investment within a particular sector may underperform other securities within that same sector. Certain bonds selected for the Fund's portfolio may decline in value more than the overall bond markets.

The RiverFront Dynamic US Flex-Cap ETF is not suitable for all investors. Subject to investment risks, including possible loss of the principal amount invested.

RiverFront's Price Matters® discipline compares inflation-adjusted current prices relative to their long-term trend to help identify extremes in valuation.
